

560pcs Heat Shrink Tubing Set – Premium Insulation Shrinkable Tube Kit for Electrical Wiring Protection

When it comes to **electrical insulation, wire protection, and cable organization**, nothing beats the reliability and convenience of the **560pcs Heat Shrink Tubing Set**. This comprehensive kit provides everything you need to secure, insulate, and protect your electrical connections like a professional. Whether you're a **DIY hobbyist, electrician, or electronics engineer**, this set is an essential addition to your workspace.

Comprehensive Kit – 560 Pieces in Multiple Sizes

This **value-packed kit** includes **560 pieces** of high-quality heat shrink tubing in **various diameters and lengths** to suit a wide range of applications. Each piece is precut and neatly organized in a **compartmentalized storage box**, making it easy to find the exact size you need.

Typical size range includes:

- **Φ1.0mm – Φ13.0mm** (before shrinking)

- Lengths of **40mm to 80mm** depending on tube size

No more searching for the right size or wasting time cutting long tubes — this kit keeps your workspace organized and efficient.

High-Quality Material & Excellent Shrink Ratio

Each tube in the **560pcs Heat Shrink Tubing Set** is made of **premium polyolefin material**, known for its **excellent insulation, flexibility, and flame retardance**. With a **2:1 shrink ratio**, the tubing shrinks to half its original diameter when heated, ensuring a **tight and secure fit** around wires, connectors, and terminals.

This provides:

- **Strong mechanical protection** against abrasion and impact
- **Reliable electrical insulation** for safer connections
- **Moisture and corrosion resistance** for long-lasting performance

Easy to Use – Perfect for Professionals and Beginners

Using the **heat shrink tubing** is simple and effective:

1. Choose the appropriate size.
2. Slide the tube over the exposed wire or connector.
3. Apply heat using a **heat gun, lighter, or hairdryer** (recommended: heat gun for best results).
4. Watch it shrink tightly around your connection for a clean, professional finish.

It's the ideal solution for anyone who wants to make **neat, safe, and durable wire connections** — no messy tape or unreliable wrapping needed.

Ideal for Multiple Applications

This **versatile heat shrink tubing kit** is suitable for a wide variety of applications, including:

- **Electrical and electronic repairs**
- **Automotive wiring and harnesses**
- **RC hobbies, drones, and model making**
- **Home DIY and cable management**
- **Marine and industrial use**

Whether you're fixing a broken cable, protecting a solder joint, or color-coding wires, this set offers the flexibility you need for any project.

Organized Storage Box

The included **durable plastic case** keeps all 560 pieces sorted by size and color, so you can quickly grab what you need. The transparent lid helps you identify the contents at a glance, while the compact design makes it easy to carry or store in your toolbox.

Key Features

- 560 assorted heat shrink tubes in multiple sizes
- High-quality polyolefin material – flexible and flame-retardant
- 2:1 shrink ratio for a snug and secure fit
- Waterproof and corrosion-resistant
- Easy to use with heat gun or lighter
- Suitable for electrical, automotive, and DIY applications

- Comes in a well-organized storage box

Why Choose the 560pcs Heat Shrink Tubing Set?

This kit combines **quantity, quality, and convenience** in one complete package. The **wide range of sizes**, along with the **high-performance material**, ensures reliable insulation and long-term protection for all your wiring needs. From **home repairs** to **professional electrical projects**, this set guarantees safe and professional-looking results every time.

Stop using electrical tape that peels over time — upgrade to the **560pcs Heat Shrink Tubing Set** and experience cleaner, safer, and more efficient wire management.
