

# SONOFF MINIR4 Smart WiFi Light Switch

The **SONOFF MINIR4 Smart WiFi Light Switch** is a compact and powerful smart device designed to simplify home automation. It allows you to remotely control lighting and other electrical devices, creating a smarter, more efficient, and convenient living space. With WiFi connectivity, app control, voice assistant integration, and support for smart scenes and automation, the MINIR4 is the ideal solution for homeowners looking to upgrade their traditional switches into a modern smart home system.

## Compact Design with High Compatibility

The SONOFF MINIR4 is a **miniature smart switch module** that can be installed behind your existing wall switch without altering the wall design. Its compact design makes it easy to integrate into your home, while its flexible wiring options ensure compatibility with a wide range of devices and electrical systems. The MINIR4 works with both **single-pole and multi-way switch setups**, giving you maximum flexibility for installation in various rooms.

## Smart WiFi Control

The MINIR4 connects directly to your home WiFi network, allowing **remote control through the eWeLink app**. From your smartphone or tablet, you can turn lights on or off, check the status of connected devices, and manage your home's lighting from anywhere in the world. Whether you are at home, at work, or on vacation, you have full control over your devices at your fingertips.

## Voice Assistant Integration

For hands-free convenience, the SONOFF MINIR4 supports **Amazon Alexa, Google Assistant, and Siri Shortcuts**. This enables you to control lights and devices using simple voice commands. Examples include:

- “Alexa, turn on the living room lights”
- “Hey Google, switch off the bedroom lamp”

Voice control allows for effortless device management, improving comfort and accessibility throughout your home.

## Smart Automation and Scenes

With the eWeLink app, the MINIR4 allows you to create **custom automation and smart scenes**. You can schedule lights to turn on or off at specific times, activate multiple devices simultaneously, or create conditions based on other smart devices. Examples include:

- Schedule bedroom lights to gradually turn on at sunrise
- Automatically switch off all lights when leaving home
- Link with sensors to trigger lights when motion is detected

These automation features make your home more energy-efficient and enhance convenience for your daily routine.

## Reliable and Safe Operation

The SONOFF MINIR4 is engineered with **high-quality materials** and reliable circuitry, ensuring safe operation for both low and high-power lighting devices. It supports **AC 90-250V input** and is capable of handling standard household lighting loads. This makes it suitable for various types of lights, including LEDs, CFLs, and incandescent bulbs. The compact and robust design ensures **durability and long-term performance**.

# Smallest Wi-Fi Smart Switch Ever

SONOFF MINI Extreme Wi-Fi Smart Switch

## Key Features

- **Compact design** – Easily installs behind existing wall switches
- **WiFi remote control** – Manage devices from anywhere via eWeLink
