SONOFF DW2-Wi-Fi Wireless Door/Window Sensor

The **SONOFF DW2-Wi-Fi Wireless Door/Window Sensor** is a reliable and compact smart device designed to enhance the security and automation of your home. By monitoring the opening and closing of doors or windows, this sensor allows you to protect your property, receive real-time notifications, and integrate with other smart devices to create a fully automated smart home ecosystem. With easy installation, Wi-Fi connectivity, and compatibility with the eWeLink app, the DW2-Wi-Fi ensures convenience, safety, and peace of mind.

Wireless Security Monitoring

The SONOFF DW2-Wi-Fi is specifically designed to monitor doors and windows, instantly detecting when they are opened or closed. Using **wireless connectivity**, the sensor communicates directly with the eWeLink app on your smartphone, sending **instant alerts** if unauthorized entry is detected. This makes it an ideal solution for:

- Protecting your home from intruders
- Monitoring office entrances or sensitive areas
- Keeping track of access in commercial spaces

With real-time notifications, you are always aware of the status of your doors and windows, even when you are away.

Easy Installation

The DW2-Wi-Fi features a **compact and lightweight design**, allowing for quick and hassle-free installation. No wiring or drilling is required – simply attach the sensor and magnet to the door or window frame using the included adhesive. Its low-profile design ensures that it blends seamlessly with your home décor, maintaining aesthetics while providing effective security monitoring.

Smart Home Integration

The SONOFF DW2-Wi-Fi is compatible with the **eWeLink app**, which allows you to control and monitor your sensors remotely. You can also integrate the sensor with other smart devices in your home to create **automation routines and smart scenes**. For example:

- Automatically turn on lights when a door is opened
- Trigger an alarm or smart camera when unauthorized access is detected
- Activate home automation devices such as air conditioners, fans, or heaters based on door or window activity

These automation features increase convenience, energy efficiency, and security in your home.

Notifications and Alerts

Once the sensor detects that a door or window has been opened or closed, it **sends instant push notifications** to your smartphone. This feature allows homeowners and office managers to stay informed at all times. Additionally, the sensor can work with **multiple users**, allowing all family members or authorized personnel to receive alerts simultaneously.

Long Battery Life

The DW2-Wi-Fi is designed to operate efficiently with **low power consumption**, providing long battery life that minimizes maintenance. With its energy-efficient design, the sensor can operate for **months on a single battery**, ensuring continuous monitoring without frequent replacements.

Compatibility and Voice Control

The SONOFF DW2-Wi-Fi works seamlessly with **Amazon Alexa and Google Assistant**, enabling voice control and smart home integration. While primarily a security sensor, its compatibility with these platforms allows you to include it in broader smart home routines. For example:

- "Alexa, arm the security system when the front door is closed"
- "Hey Google, turn on the hallway lights when the back door opens"

This adds convenience and flexibility to your smart home setup.

Install in Seconds

Tool-free installation. Adopts 3M adhesive on the bottom of the sensor for easier installation

*Make sure the installation gap is less than 5mm when the door or the window is closed.

Key Features

- Wireless door/window sensor for home security
- Real-time notifications and alerts on your smartphone
- Easy, no-wiring installation with adhesive mounting
- Long battery life with low power consumption

- Integrates with eWeLink app for smart automation and remote control
- Compatible with Alexa and Google Assistant for voice commands
- Can trigger other smart devices in scenes and automation routines

Ideal Applications

The SONOFF DW2-Wi-Fi is perfect for:

- **Homes** – Monitor doors and windows for added security
- **Offices** – Keep track of access to sensitive areas
- **Commercial spaces** – Protect shops, warehouses, and storage areas
- **Smart home automation** – Link sensors to lights, cameras, and alarms

Conclusion

The **SONOFF DW2-Wi-Fi Wireless Door/Window Sensor** is an essential device for anyone looking to increase home security while integrating smart automation. Its compact design, wireless connectivity, remote monitoring, automation capabilities, and compatibility with voice assistants make it a reliable and versatile solution. Protect your home or workspace while enjoying the convenience of smart home technology with the **SONOFF DW2-Wi-Fi**.
