SONOFF NSPanel Smart Scene Wall Switch – EU – White

The **SONOFF NSPanel Smart Scene Wall Switch – White Edition** is more than just a switch – it's an all-in-one smart home control center. Designed for modern living, this wall-mounted panel combines elegance, functionality, and seamless integration to give you complete control of your smart home. With its **3.5-inch TFT LCD touchscreen**, intuitive interface, wide compatibility, and advanced automation features, the NSPanel transforms the way you manage your connected devices. Whether you're adjusting the lighting, setting the perfect temperature, or creating custom scenes, the NSPanel makes it effortless.

Elegant Design for Modern Homes

The NSPanel White Edition features a **luxurious matte finish and slim profile**, ensuring that it blends perfectly with any interior décor. Its flush-mount design integrates seamlessly with your wall, delivering a clean and polished look. Unlike bulky controllers or visible hubs, the NSPanel is built to be **both functional and stylish**, elevating the overall aesthetics of your smart home.

3.5-Inch TFT LCD Touchscreen

At the heart of the NSPanel is its **3.5-inch vivid TFT LCD display**. The touchscreen provides smooth navigation, fast response, and a highly intuitive interface that simplifies device management. Instead of juggling multiple apps or remotes, you can now control your most-used devices directly from the wall switch. The vibrant screen not only looks premium but also ensures **quick access** to lighting, heating, curtains, or other smart appliances.

Wide Device Compatibility

One of the standout features of the SONOFF NSPanel is its **unrivaled compatibility**. It supports a wide range of devices, including smart bulbs, LED strips, fans, heaters, plugs, and more. The NSPanel works seamlessly with the **eWeLink app**, ensuring that all SONOFF devices, such as the MINIR2, TX series, POWR3, and LED Filament Bulbs, can be easily integrated. For advanced users, the device also supports **Tasmota firmware**, making it flexible for custom smart home ecosystems.

Smart Scenes & Automation

With the NSPanel, you can **customize smart scenes** tailored to your lifestyle. Create automation routines that activate based on **time, weather conditions, temperature, or even your location**. For example, set the panel to automatically close the curtains at sunset, turn on the heater when the temperature drops, or schedule the lights to turn off when you leave the house. This level of customization ensures your smart home adapts to your needs effortlessly.

Real-Time Energy Monitoring

The SONOFF NSPanel isn't just about control—it's also about **efficiency and sustainability**. The built-in energy monitoring function allows you to **track your power usage in real time**, helping you identify energy-hungry devices and optimize your consumption. By becoming more energy-conscious, you can **lower your electricity bills** while also reducing your carbon footprint.

Voice Control with Alexa & Google Home

For hands-free convenience, the NSPanel integrates smoothly with **Amazon Alexa and Google Assistant**. Control your devices with simple voice commands, such as *"Alexa, turn off the living room lights"* or *"Hey Google, close the curtains."* This feature is perfect when your hands are full or when you simply want the **comfort of controlling devices without touching the panel**.

Secure & Reliable Smart Control

SONOFF has designed the NSPanel with **advanced security protocols and encryption** to ensure that your smart home is protected from unauthorized access. With a stable connection and reliable performance, you can trust that your devices will respond quickly and securely every time.
