

SONOFF NSPanel US B Smart Scene Wall Switch

The SONOFF NSPanel US B Smart Scene Wall Switch is a revolutionary device that combines elegance, convenience, and intelligent home automation into a single wall-mounted panel. Designed for modern smart homes, the NSPanel US B transforms the way you interact with your connected devices. It provides centralized control for lighting, curtains, fans, and more. With its intuitive touchscreen interface, wide device compatibility, and advanced automation capabilities, this panel ensures your smart home is both functional and stylish.

Elegant Design for Modern Interiors

The NSPanel US B features a sleek flush-mounted design that integrates seamlessly into your walls, providing a minimalist and contemporary look. Its refined finish adds sophistication to any room, eliminating the clutter of multiple switches and remote controls. The panel's ergonomic design ensures it is visually appealing and highly functional, making it perfect for modern homes, offices, and commercial spaces.

Interactive Touchscreen Control

At the heart of the NSPanel US B is a vivid 3.5-inch TFT LCD touchscreen. This high-resolution display allows you to navigate your smart home ecosystem effortlessly. The user-friendly interface offers quick access to your most-used devices and scenes, streamlining home management. Instead of relying on multiple apps or physical switches, you can now control your entire smart home directly from a single panel.

Wide Device Compatibility

The SONOFF NSPanel US B supports a broad range of devices, making it a versatile hub for your smart home network. It works with SONOFF smart bulbs, LED filament bulbs, LED light

strips, TX series switches, MINIR2 modules, POWR3 switches, and more. The panel supports both eWeLink and Tasmota firmware, giving users flexibility for custom automation setups.

Custom Scenes and Automation

The NSPanel US B allows you to create personalized smart scenes tailored to your lifestyle. Automate multiple devices simultaneously based on conditions such as time, weather, temperature, or location. For example:

- Schedule your lights to turn on at sunset
- Automatically close curtains when the temperature rises
- Activate your fan or air conditioner when humidity exceeds a set level

Advanced automation ensures your home responds intelligently to your needs, providing comfort, convenience, and energy efficiency.

Real-Time Energy Monitoring

The NSPanel US B features built-in energy monitoring, allowing you to track electricity consumption for connected devices. This data helps you identify energy-hungry appliances, optimize usage, and save on utility bills. By making your home more energy-efficient, the NSPanel contributes to cost savings and a greener, sustainable lifestyle.

Voice Control with Alexa and Google Home

For ultimate convenience, the NSPanel US B integrates with Amazon Alexa and Google Assistant, enabling hands-free voice control. Command your smart devices with simple phrases, such as:

- “Alexa, turn off the living room lights”
- “Hey Google, close the bedroom curtains”

Voice control allows effortless management of your smart home even when your hands are full.

Secure and Reliable Smart Home Hub

Security is a priority for SONOFF. The NSPanel US B features advanced encryption and secure connection protocols, ensuring your smart home devices are protected from unauthorized access. Reliable connectivity guarantees that your commands are executed promptly and safely.

Key Features

- Stylish flush-mount design for seamless integration
- 3.5-inch TFT touchscreen for intuitive control
- Supports SONOFF devices and Tasmota firmware
- Custom scenes and automation for time, weather, or location
- Real-time energy monitoring for efficiency
