

Rechargeable AA Battery 2100mAh | Westinghouse (2 PCS)

The **Westinghouse Rechargeable AA Battery 2100mAh (2 PCS)** offers powerful, long-lasting energy for your everyday electronic devices. Engineered with advanced **Nickel-Metal Hydride (Ni-MH)** technology, these rechargeable AA batteries deliver **consistent performance, high capacity, and excellent reliability**. Designed by **Westinghouse**, a global leader in energy solutions, these batteries provide a dependable and eco-friendly alternative to disposable alkaline cells.

Whether you're powering cameras, remotes, flashlights, gaming controllers, or portable gadgets, **Westinghouse 2100mAh AA batteries** ensure strong and stable power output for all your devices.

High-Capacity Power for Everyday Use

Each **Westinghouse AA Ni-MH battery** has a **capacity of 2100mAh**, offering superior runtime compared to standard rechargeable batteries. This high capacity ensures that your devices stay powered for longer between charges, reducing interruptions and improving convenience.

The **stable 1.2V output** provides smooth and consistent performance, making these batteries perfect for high-drain devices such as:

- Digital cameras and flashes
- Wireless keyboards and mice
- Game controllers
- LED flashlights
- Portable audio devices
- Toys, clocks, and remotes

You'll enjoy **longer usage times, fewer recharges, and dependable power delivery** in all your favorite devices.

Rechargeable and Eco-Friendly Solution

The **Westinghouse 2100mAh Rechargeable AA Batteries** are built for sustainability and long-term savings. Unlike disposable alkaline batteries that end up in landfills after one use, these Ni-MH cells can be **recharged up to 1000 times**, drastically reducing environmental waste.

With every recharge, you reduce your carbon footprint and save money by eliminating the need for constant battery replacements. These rechargeable batteries provide a perfect combination of **power efficiency**, **cost-effectiveness**, and **environmental responsibility**.

Advanced Ni-MH Technology

The **Nickel-Metal Hydride (Ni-MH)** chemistry in Westinghouse batteries offers several advantages over older battery types:

- **Higher Capacity:** Delivers more power than traditional Ni-Cd batteries.
- **Memory-Free Performance:** Can be recharged at any time, even when partially drained.
- **Stable Output:** Maintains consistent voltage throughout usage.
- **Environmentally Safe:** Contains no toxic metals like cadmium or mercury.

This makes **Westinghouse 2100mAh Ni-MH batteries** ideal for powering modern, high-performance devices while maintaining energy efficiency and safety.

Low Self-Discharge and Long Shelf Life

These **Westinghouse rechargeable batteries** feature **low self-discharge technology**, meaning they retain most of their charge even after long periods of storage. When fully charged, they can hold up to **80% of their capacity after 12 months**, ensuring they're always ready to use when you need them.

Whether stored in your emergency kit, travel bag, or toolbox, these batteries stay charged and reliable for months, providing **long-term dependability** and **instant readiness**.

Safety, Quality, and Durability

Westinghouse's legacy of innovation and reliability ensures that every battery meets the highest safety and performance standards. These AA rechargeable batteries are equipped with:

- **Overcharge Protection**
- **Over-Discharge Protection**
- **Short-Circuit Protection**
- **Temperature Control Mechanisms**

The **sturdy outer shell** resists heat, pressure, and impact, ensuring long service life even under heavy usage. These safety features make the **Westinghouse 2100mAh Rechargeable AA Batteries** suitable for both home and professional use.

Key Benefits

- **High Capacity:** 2100mAh for long-lasting power
 - **Rechargeable:** Up to 1000 recharge cycles
 - **Eco-Friendly:** Reduces battery waste and environmental impact
 - **Low Self-Discharge:** Retains charge for up to a year in storage
 - **Safe and Reliable:** Built-in protection against overcharging and overheating
 - **Universal Compatibility:** Works with all AA-powered devices
-

Perfect for Multiple Applications

The **Westinghouse Rechargeable AA Battery 2100mAh (2 PCS)** set is versatile and suitable for a wide range of devices, including:

- Cameras and photo equipment
- Wireless devices and peripherals
- Flashlights and torches
- Toys and hobby gadgets
- Household electronics

These batteries deliver **stable, long-lasting energy**, making them an ideal choice for both everyday users and professionals who rely on consistent performance.

Conclusion

The **Westinghouse Rechargeable AA Battery 2100mAh (2 PCS)** offers **premium power, durability, and sustainability** in one package. Designed for high efficiency and long-lasting performance, these rechargeable batteries are a perfect replacement for disposable cells, helping you **save money and protect the environment** at the same time.

With **2100mAh high capacity**, **low self-discharge**, and **over 1000 recharge cycles**, they provide dependable power for all your devices — from cameras and remotes to flashlights and toys. Backed by **Westinghouse's trusted quality**, these rechargeable AA batteries are a smart, long-term investment for any household or professional application.

Choose **Westinghouse Rechargeable AA Batteries** today and experience **power that lasts, performance you can trust, and sustainability that makes a difference.**
