

Panasonic NCR18650B Rechargeable 18650 Li-ion Battery 3.6V 15A 3350mAh (New)

The **Panasonic NCR18650B Rechargeable 18650 Li-ion Battery 3.6V 15A 3350mAh** is a **high-capacity, high-performance lithium-ion battery** designed for both professional and personal applications. Renowned for its **long lifespan, high energy density, and robust reliability**, this new 18650 battery is perfect for powering **high-drain devices, DIY projects, flashlights, power tools, and electric vehicles**.

With a nominal voltage of **3.6V**, a maximum continuous discharge of **15A**, and a remarkable **3350mAh capacity**, the Panasonic NCR18650B ensures **stable, long-lasting power** with exceptional efficiency and performance.

Exceptional High-Capacity Li-ion Technology

The **Panasonic NCR18650B** utilizes advanced **lithium-ion technology**, delivering superior energy density in a compact 18mm x 65mm cylindrical form factor. The 3350mAh capacity provides

extended runtime for demanding devices, while the 15A discharge current makes it suitable for **high-drain electronics**, ensuring your devices operate reliably without voltage drop.

Key features include:

- **Nominal Voltage:** 3.6V for consistent energy delivery
- **High Capacity:** 3350mAh for long-lasting performance
- **Continuous Discharge Current:** 15A for high-power applications
- **Rechargeable:** Hundreds of recharge cycles without significant capacity loss
- **Low Self-Discharge:** Retains charge for long periods of inactivity

This combination of high capacity and high discharge rate makes it a top choice for **flashlights, vaping devices, power tools, and portable electronics**.

Rechargeable and Cost-Effective

The **Panasonic NCR18650B** is fully **rechargeable**, allowing hundreds of charge cycles and providing a **cost-effective alternative** to disposable batteries. Its durable construction and advanced chemistry **minimize memory effect** and maintain stable performance even after repeated charging, reducing replacement costs and environmental impact.

By choosing rechargeable lithium-ion technology, users benefit from **long-term savings, environmental responsibility**, and superior performance compared to older Ni-MH or Ni-Cd batteries.

Wide Range of Applications

The **Panasonic NCR18650B 3.6V 15A 3350mAh battery** is highly versatile and compatible with a wide range of devices, including:

- **High-Performance Flashlights:** Ensures extended illumination for long periods
- **Electric Vehicles & E-bikes:** High-capacity power for motorized applications
- **Power Tools:** Stable energy for drills, saws, and portable equipment
- **Vaping Devices & E-cigarettes:** High-drain applications with stable output
- **Portable Electronics & DIY Projects:** Perfect for robotics, custom battery packs, and power banks

Its **standard 18650 form factor** allows easy integration into most compatible devices and DIY battery packs.

Safety and Reliability

Panasonic batteries are synonymous with **safety and quality**. The NCR18650B includes:

- **Overcharge and Over-Discharge Protection** for battery longevity
- **Short-Circuit Protection** for secure operation
- **Temperature Stability** for reliable performance under varying conditions
- **Robust Casing** for mechanical durability and impact resistance

These features make the NCR18650B **safe, dependable, and durable** for both professional and everyday applications.

Benefits

- **High Capacity:** 3350mAh ensures long runtime
 - **High Discharge Current:** 15A continuous output for high-drain devices
 - **Rechargeable:** Hundreds of recharge cycles for cost efficiency
 - **Stable Voltage:** 3.6V nominal voltage for consistent device performance
 - **Eco-Friendly:** Reduces disposable battery waste
 - **Durable and Reliable:** Robust build quality ensures longevity
 - **Versatile Applications:** Compatible with flashlights, e-bikes, power tools, and DIY battery packs
-

Conclusion

The **Panasonic NCR18650B Rechargeable 18650 Li-ion Battery 3.6V 15A 3350mAh** is a **premium solution for high-performance energy needs**. Its **high capacity, stable voltage, and high discharge rate** make it ideal for **high-drain devices, portable electronics, and DIY projects**.

Invest in the **Panasonic NCR18650B** to enjoy **long-lasting, reliable, and efficient power** while reducing battery replacement costs and environmental impact. Perfect for professionals and enthusiasts alike, this battery ensures your devices perform at their best, every time.
